ACTION PLAN FROM STAKEHOLDERS FEEDBACK ANALYSIS 2023-24

Through the feedback analysis, the following are actionable suggestions:

1. Construction of Faculty Restroom in the East Block

It is recommended to construct a dedicated restroom facility for faculty members within the East Block. This will enhance convenience, privacy, and accessibility, ensuring that faculty have appropriate amenities in close proximity to their offices and workspaces.

2. Development of an Auditorium

To accommodate larger gatherings, lectures, and events, the construction of a modern auditorium is proposed. This facility would support a range of academic and extracurricular activities, fostering a conducive environment for learning, presentations, and community engagement.

3. Enhancement of ICT Facilities

Upgrading the existing ICT infrastructure is essential to support the growing technological needs of the institution. This includes the installation of smart TVs, the establishment of smart classrooms, and the improvement of Wi-Fi connectivity across the campus. These upgrades will improve both teaching and learning experiences and enable seamless communication and collaboration.

4. Upgrading of Canteen Services and Facilities

The canteen services should be upgraded to provide a better variety of food options, enhanced hygiene standards, and improved seating arrangements. A more comfortable and efficient dining environment will significantly enhance the overall experience for students, faculty, and staff.

5. Increased Plantation Across Campus

It is recommended to plant additional trees and greenery throughout the campus. This will not only enhance the aesthetic appeal of the environment but also contribute to sustainability efforts by improving air quality and creating more serene outdoor spaces for the campus community.

6. Development of Playground Facilities

The establishment of well-equipped playground facilities is crucial for promoting physical activity and sportsmanship among students. Expanding and improving the existing playground will encourage healthier lifestyles and provide recreational options for students and faculty alike.
